Life in the english colonies timeline

Antigua has been said to be one of the most preserved colonial cities in the world, Guatemala correspondent Michael Paladin wrote in the January 15 issue of today's overseas retirement letter. In my opinion, it is ranked above Havana, Cuba, Granada, Nicaragua, and Merida, Mexico. Also known as the eternal spring country, the rain begins in May and ends in October, and the surrounding valleys and mountains are vegetation and lush. In the afternoon, the sky gradually darkens: around 3 p.m., the first rain begins and often becomes a downpour, filling the street as the storm disappears. Then the downpour stopped and the air was pure and fragrant again. The carriage is waiting by the square, shoe shine sellers cycle in small black wooden boxes and hope to find tourists wearing anything other than canvas shoes and hiking boots. Local police standing around with tourist police are usually their best customers. Originally, the square was barren, treeless, hanging, lying, and other official sites of punishment, even if any violations were considered to be holy by Spanish conquerors and church brethren. Today, the park is full of trees and lives with bird songs and clip crops of horses going around the cobblestone street. Does the charm, elegance and history come to life in this colonial city? What if you invest in one of the colonial buildings this city is known for?
